Order Method:

As a customer I want to quickly and effortlessly place an order for the selected products so that I can complete the purchase easily, quickly and effortlessly.

Success:

- Multiple products can be selected.
- Number of each product can be selected.
- Products can be added to the shopping cart.
- Can do pre-order for a product.

Failure:

- The product is stock out.
- No internet connection.
- This page can't be load.

Payment Method:

As a customer I want to have a secure and smooth payment method for my orders so that I can complete the transaction effectively without any hassle.

Success:

- Credit Card can be used for payment.
- Bkash account can be used for payment.
- Cash on delivery is allowed.
- A confirmation massage will be sent to the customer.
- An e-receipt will be sent to the customer via mail.

Failure:

- Showing the message -"Enter valid mobile no or Mail address"
- Showing the message - " The selected District/ City/ Area/ Postal Code is not valid"
- Showing the message - " The applied coupon is not valid"
- Card is declined
- There is no Bkash account for this number or don't have sufficient balance
- No internet connection
- This page can't be load

Purchase History:

As a registered customer I want to easily view and track my purchase history So that I can see past orders.

Success:

- All the purchase history will be shown with respective time.

Failure:

- No internet connection
- This page can’t be load
